Typhoon Season is Coming, Pay Attention to Weather Reports

Tropical Cyclones are rotating disastrous weather systems which mainly affect Macao from May to November. In Macao, tropical cyclones are currently classified into six categories: tropical depressions, tropical storms, severe tropical storms, typhoons, strong typhoons and super typhoons. Whenever a tropical cyclone is likely to affect Macao, the Macao Geophysical and Meteorological Bureau will hoist different signals including No.1, No.3, No.8, No.9 and No.10 according to the predicted severity and impact. When the Typhoon Signal No.8 or above is hoisted, all outdoor and marine activities shall be suspended. Prior to the release of a "Storm Surge" warning, the Macao Geophysical and Meteorological Bureau will issue "Storm Surge" alerts in anticipation of possible flooding situations: Blue means the water level is expected to be less than 0.5 metre above road level; Yellow indicates that the water level is expected to be 0.5 to 1.0 metre; Orange represents water levels expected to be 1.0 to 1.5 metres; Red stands for water levels expected to be 1.5 to 2.5 metres; Black means the water level is expected to be more than 2.5 metres. Tourists should pay special attention to changes in the weather, or obtain the latest emergency information through the APP "GeoGuide for emergency" launched by the Cartography and Cadastre Bureau.

Dialogues in Macau

Interested in nature and art? Why not try a new outdoor story theatre experience! This autumn, away from the crowded urban jungle, let’s go on a “farm” exploration to enjoy the natural outdoors with our own senses, find the intimate connection between people and the land, and tell a story of our own through the transformation and presentation of theatre art.

Smart Application for Visitor Flows

The website-based “Smart Application for Visitor Flows” offers computer-generated estimates for foot traffic at main tourist attractions around Macao, namely for the immediately-following four hours, the following 24 hours and the following seven days. Forecasts are presented according to different levels of congestion in relation to numbers of tourists, ranging from “comfortable”, “moderate”, or “lightly congested”, to “congested” or “heavily congested”. The goal of the app is to allow visitors and industry operators to better plan an exploration of Macao, and improve the overall experience of such a visit. The system currently monitors a total of 20 popular local tourist attractions, including a number of attractions in the UNESCO-listed Historic Centre of Macao, as well as sites in Taipa and Coloane.

9th Oxfam TowerRun

Organised by Oxfam in Macau since 2014 on the International Day for the Eradication of Poverty, the fundraising sports event Oxfam TowerRun takes place annually at the Macau Tower - the tallest building in the city - and aims to raise public awareness about poverty. The event includes an Individual Challenge (Full Race - 61 levels) Men’s and Women’s Race, Individual Challenge (Half Race - 31 levels) Men’s and Women’s Race, and Team Challenge (Relay for teams of four - 61 levels). Participants need to take up the challenge of running up 1,298 steps from the ground floor of the tower to the adventure deck on the 61st floor. Based on the past records, it takes about 20 minutes to complete the run, which is equivalent to the time it takes for a herder in Qinghai - now impacted by climate change - to find water. Participants can not only experience the plight of herdsmen seeking water, but also can support charity with perseverance and unyielding sportsmanship.
